ABSTRACTED-PUB-NO: JP 02112460A

BASIC-ABSTRACT:

The high tensile strength textile sheet, which contains very fine fibre, is claimed in which (1) the textile sheet is composed of a random mixt. of (a) very fine fibre with average fibre dia. of 0.1-8.0 microns and (b) thicker fibre with 10 microns or greater average fibre dia.; (2) the thicker fibre is thermoplastic fibre having 10-200 deg.C lower m.pt. than the very fine fibre; and (3) the thermoplastic fibre and the very fine fibre are at least partially welded together.

USE/ADVANTAGE - The textile sheet is used as a material of filter, wiper, thermal insulator, etc. It offers improved tensile strength without reinforcement.
